

Dr. Foster Thanked for State Fair Mobile Screening Unit Participation

10/27/2011

This letter was written to Dr. Foster recently in regard to her involvement and participation with the Kansas Lions Sight Foundation at the State Fair – specifically helping out in the Mobile Screening Unit:

“The Kansas Lions Sight Foundation (KLSF), BC/BS Foundation would like to share our sincere appreciation for your expertise and assistance with the Mobile Screening Unit (MSU) at this year's state fair. With your help we were able to screen 1,831 individuals for 5,283 different screenings at the fair. We are planning to have the MSU at the 2012 state fair September 7th through and including September 16th. In 2012 we will be adding a Pedia-Vision Screener to the MSU which screens for visual problems even in babies. Thank-you for helping to provide these services to our Kansas neighbors.”

1,831 people screened!!! Wow! Come see Dr. Foster again in 2012.
